

## Discover the Structure Networks ITAdvantage™...

Whether you require an IT resource for a month or a year, we understand it takes more than someone who simply has the technical ability to get the job done. You expect someone you can count on to take your work as seriously as you do. Understanding your business, your culture, and your needs is our business. Structure Networks helps build a foundation upon which your business can grow by providing best-of-breed Contract IT Consultants.

### We Make IT work!

Structure Networks is a Nation-wide IT Staffing Firm with a single focus: your company's success. We specialize in delivering top-notch talent ensuring you meet your project deadlines each and every time. Our firm has a true understanding of the region it is servicing. In addition, every staff member has at least 10 years of industry experience (many of us are consultants, not sales people). We believe that for us to truly service your organization, we must have an understanding of what you are facing everyday. We make the effort to get to know your business and we will strive to prove that to you. That means a short learning curve for us and timely on-boarding of consultants for you and your organization.

Whether a full team is deployed or Structure Networks is tasked with augmenting your current staff, we have the knowledge, expertise, and industry know-how to help you build a solid technology foundation for your business.

### ROI: The Guiding Light...

**Contract Staffing Solutions:** Our methodologies, coupled with our customer teaming approach, allow us to provide the highest quality technical resources at competitive costs. Our recruitment model is designed to bring together the best and brightest minds to consistently meet your contracting requirements. From individual consultants to complete project teams, count on Structure Networks to provide resources that you can count on

**Contract-to-Hire:** Structure Networks recognizes that your expectations are continually increasing and the competition you are facing is fierce. The contract to hire option is optimal given the current marketplace, allowing you to determine if there is a technical and cultural match prior to committing to full-time employment.
