

## CPA Resource Group: Finance Meets Technology™

Where Finance meets Technology; this is the engine of your business. Structure Networks Financial Services offering, the CPA Resource Group, offers the expertise of a National consulting and staffing company with a deep technical reach via our network of affiliated CPA firms. We deliver on-demand financial consultants from coast-to-coast.

### We Have the Answer!

The challenges of business increase every day. Decision makers face major new initiatives, raising capital, going public, mergers and acquisitions, and Sarbanes-Oxley; all in addition to the grind of period to period financial reporting. Hiring and training additional full-time staff may not be an option due to the cost and time commitment required.

So where do you turn for interim help? Your outside audit firm is the most technically proficient and trustworthy source available, but they may not be allowed to assist you due to independence issues. A traditional staffing company can provide flexibility but may not give you the consistency of professionals.

Structure Networks CPA Resource Group combines the expertise of a national consulting and staffing company with the deep technical resources of our network of affiliated CPA firms. Our firm combines the best of all worlds: the dedication of a finance and accounting consulting firm, the depth of a staffing firm, and the technical resources of a CPA firm; all at cost effective rates.

Structure Networks CPA Resource Group can provide you with consultants who are:

- Accomplished problem solving professionals
- Overqualified and can adjust quickly to all of your needs
- A variable expense at cost effective hourly rates
